Percy Jiménez Morera

Software Developer | Web Development · API Integration · Software Quality

pergabriel32@gmail.com · Costa Rica · LinkedIn

PROFESSIONAL PROFILE

Advanced Technician in Software Development with experience in client projects and independent initiatives, as well as quality assurance (QA). Involvement in different stages of digital solution development, from analysis through functional testing.

EXPERIENCE

Independent Software Developer

Experience developing a variety of software projects for clients and on my own initiative, addressing different needs through digital solutions.

Involvement throughout the development lifecycle: requirements analysis, interface design, programming, database and API integration, implementation, testing, and quality assurance.

Quality Assurance (QA) | Prides, 2024

Participation in software testing and quality control processes to verify functionality and identify potential issues.

Mathematics Tutoring and Teaching

Private tutoring and participation in educational initiatives, including a project serving Indigenous communities in Talamanca (TEC, 2012–2014) and teaching students with hearing impairments.

TECHNOLOGIES AND TOOLS

Development: HTML, CSS, JavaScript, Java, JavaFX, Node.js, and object-oriented programming.

Data and integration: SQL, MySQL, SQL Server, MongoDB, JSON, APIs, and Postman.

Workflow and quality: Git, GitHub, Azure DevOps, Scrum, wireframes, Trello, and Asana.

EDUCATION

Advanced Technician in Software Development · CENFOTEC University | 2024

Studies in Mathematics Education · National University of Costa Rica | 2010–2014
